Art Unit: 1614

Claims 1-110 are presented for examination.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 provide for the use of aceclidine in a manufacture of a composition for the treatment of night sight problems, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 1 and 2 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 2 are indefinite as to the expressions "use" and "The use", which fail to clarify either a composition or method of use intended.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1614

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 00/64425 and Viegas et al. (5,958,443).

WO Patent teaches the use of the claimed compound aceclidine in a pharmaceutical formulation for the treatment of visual disorder associated with refractive surgery, wherein sodium chloride is used as a hypertonic agent. See page 3, lines 29-32, page 6, lines 18-24, page 12, lines 4 and 5, page 12, lines 29 and 30 and claims 2 and 3. Viegas et al. teach the use of hyaluronic acid in ophthalmic formulation as a film forming polymer, which can be used in combination with ophthalmic active ingredients such as a miotic agent. See column 5, lines 54-59 and column 6, lines 24-55. The primary reference differs from the claimed invention in the presence of hyaluronic acid and the amounts or concentrations used. It would have been obvious to a person skilled in the art to incorporate hyaluronic acid into the primary reference composition, considering that the secondary reference teaches the addition of such agent to ophthalmic formulation as old and well known. It would have been obvious to a person skilled in the art to determine the proper amounts or concentrations.

One skilled in the art would have been motivated to combine the teachings of the above references, since one relates to the use of the claim compound aceclidine in an ophthalmic formulation being used for the treatment of haze and night vision problems, and the other relates to the use of hyaluronic acid in ophthalmic formulation as old and well known. The determination of optimum proportions or amounts is considered to be within the skill of the artisan in the absence of evidence to the contrary. Applicant has

presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-10 are properly rejected under 35 U.S.C. 103.
